

解决“来自身份不明开发者”弹窗问题

来看看出现“来自身份不明开发者”弹窗时该如何打开 Techmino.

在您第一次打开 macOS 版本的 Techmino 时, 系统可能会提示以下弹窗:

当出现此情况时, 请尝试使用以下步骤进行操作来解决此问题:

1 打开“系统偏好设置”

在您的 Mac 上, 点击屏幕左上角菜单栏中的  标志, 然后在弹出的菜单中选择“系统偏好设置”;

2 进入“安全性与隐私”面板

在系统偏好设置中, 点击“安全性与隐私”, 点击左下角的  图标, 然后输入 Mac 用户帐户的登录密码(或验证触控 ID)来解锁;

3 选择“任何来源”

在屏幕下方的菜单中, 选中“任何来源”;

4 重新打开 Techmino

右键单击(或按住 \wedge control 后点击) Techmino.app, 在弹出菜单中点击“打开”, 然后在如下弹窗中选择“打开”。

如果“安全性与隐私”面板中没有显示“任何来源”选项, 请按如下步骤操作来激活该选项:

1 打开“终端”

打开“启动台”, 然后在面板中选择“终端”(或 Tetminal);

2 执行指令

在终端界面中输入以下指令, 按下 \hookrightarrow return, 输入 Mac 用户帐户的登录密码, 然后再次按下 \hookrightarrow return:

```
sudo spctl --master-disable
```

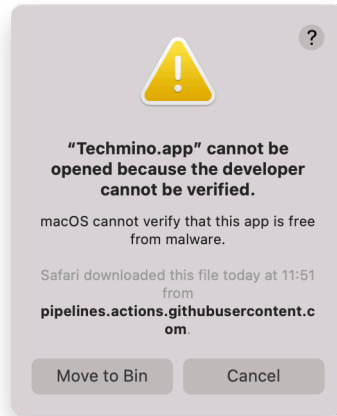

BASH/ZSH

完成后, 重新打开“系统偏好设置”即可。

Solving the “Unverified Developer” Issue

Let’s see how you can open Techmino when macOS prompts “Developer cannot be verified”.

When opening the macOS distribution of Techmino for the first time, the following window may pop up:

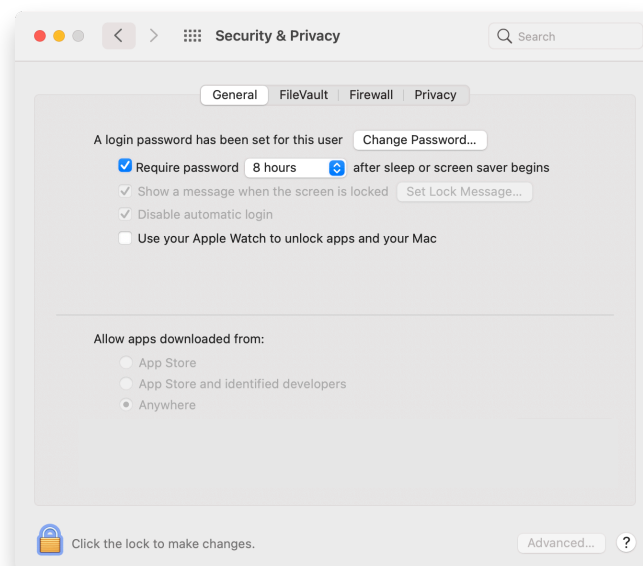

When this situation occurs, you can solve this issue using the following steps:

1 Open “System Preferences”

On your Mac, Click  in the Menu Bar and select “System Preferences” from the drop-down menu.

2 Enter “Security & Privacy” Panel

In System Preferences, click “Security & Privacy”, click on the  icon on the lower-left corner, and then enter the password for your Mac (or use Touch ID) to make changes:

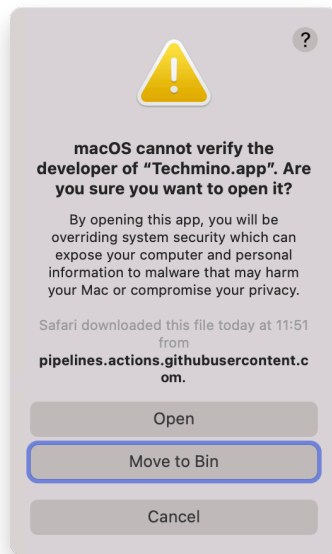

3 Select “Anywhere”

In the menu, select “Anywhere”.

4 Reopen Techmino

Right-click (or \wedge control-click) Techmino.app, click “Open” in the pop-up menu, and then click “Open” in the following menu:

If you didn't see “Anywhere” in the “Security & Privacy” Panel, you can activate it using the following steps:

1 Open “Terminal”

Open “Launchpad” and then click “Terminal”.

2 Execute the following command

Enter the following command in Terminal, press \leftarrow return, enter the password for your Mac, and press \leftarrow return again to confirm.

```
sudo spctl --master-disable
```

BASH/ZSH

When you have finished, open System Preferences again and you can see “Anywhere” available to you.
